note: flag is not in flag{} format

Write Up:

So we initially opened up the executable to see what it did and it appeared to be a game. We played it and luckily go to the end.

We then saw the flag/key fly by the screen pretty quickly.

Instead of opening up IDA pro or anything else up, we figured it would be quicker just to record our screen and play the game again.

We beat the game and when we reviewed the footage, we went frame by frame till we got the flag/key.
